DETAILED ACTION

Priority

1. This application appears to be a division of Application No. 10/215,504, filed 08-09-02. A later application for a distinct or independent invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in an earlier or parent application is known as a divisional application or "division." The divisional application should set forth the portion of the earlier disclosure that is germane to the invention as claimed in the divisional application.

Information Disclosure Statement

2. Acknowledgment is made of receipt of applicant's Information Disclosure Statement (PTO-1449) filed November 28, 2003 & March 19, 2004.

Drawings

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

Art Unit: 2811

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The examiner suggests that "Method of forming a non-volatile memory device having floating trap type memory cell".

Claim Objections

5. Claims 2-6 are objected to because of the following informalities:

Re claim 2, the phrase "(g) removing the second conductive layer and the triple layer of the respective high- and low-voltage type gate patterns" is misdescriptive because the high- and low-voltage type gate patterns do not have the second conductive layer and the triple layer. The second conductive layer and the triple layer are formed only on the exposed substrate in the cell array region (see step e).

Appropriate correction is required.

Claims 3-6 are objected because each includes the limitations of independent claim 2.

Allowable Subject Matter

6. Claims 1 & 7-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art of record neither teach nor make it obvious as a whole the claimed limitation of the instant application, as recited in claims 1, 7, 12 & 16, either taken alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2811

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
